

# Assignment 5

Math621B

due Monday December 13, 2021

This project will allow you to explore how the math we learned this semester is used in your daily life. And it's also tasty. So here is what you do.

- Make some food. If you are from another country or culture, it would be great if you made something from that culture.
- Write up how the math from 621B was used in the preparation of that food.
- Bring some of this food to class. Bring enough for 6 people to share.

Your write-up should be at least  $\frac{1}{2}$  page, but could be up to a full page. Be very specific – tell me exactly how the math applies. Give examples. Show calculations. If you work at it, you should be able to find a link to each chapter in this course.
